

KEYNOTE SPEAKER · AI & HUMAN PERFORMANCE

Awakened Intelligence.

Setting the tone in the age of AI.

8 in 10 of your employees are quietly avoiding the AI tools you just rolled out. The bottleneck isn't training — it's identity, fear, and self-talk. What HBR now calls *the psychological side of AI adoption*.

I turn AI anxiety into AI fluency by teaching the only framework where the AI is also the mirror — Program. Prompt. Practice. — applied to both the system and the self.

01 Setting the Tone in the Age of AI

All-hands · kickoffs · culture days. Inspiring and practical.

02 Closing the AI Adoption Gap

L&D · Chief AI Officer · change-management. Workflow- and tool-heavy.

03 The Three P's: An Operating System for People

Executive offsites · strategic planning. Framework-led with live demos.

01

The Limiting Belief Breaker

Custom AI agent the audience uses live in the room — surfaces the exact subconscious programming and offers the rewrite.

02

The 66-Day Rewire

Daily 5-minute practice grounded in Philippa Lally's UCL research. Comes with a personalized affirmation song generated live.

03

The Executive Assistant Agent

Practical answer to "where will I find the time?" — an AI that handles inbox, calendar, and project status so leaders get strategic time back.

Why *this* intersection.

BENZAMAMAN.COM

Three years ago Benza was a broke musician sleeping on a friend's couch in California, on food stamps, with no idea how he was going to get out.

He spent three months meditating in the woods every day. He rewired a nervous system that had been stuck in low-grade fight-or-flight for a decade. He met his own mind for the first time — and chose to speak to it differently.

Six months later he was on Zoom calls consulting VPs at **Samsung**. ChatGPT had just dropped. He pivoted into AI, the course went to **#1 on Udemy** with over 500,000 students, and the corporate trainings followed: Apple, Pepsi, Nike, Samsung. They kept rebooking him, and recommending him.

The outer transformation was real. But it came second. The real shift happened first — when he changed the program inside.

That's why Benza can stand in front of a Fortune 500 audience and talk about AI *and* consciousness in the same breath. They're the same conversation. He just happens to be the only person on the speaker circuit treating them that way.

CORPORATE TRAININGS

Samsung · Apple · Pepsi · Nike + 500,000 students on Udemy

TALK LENGTH

35–40 min keynote · half-day workshop · executive offsite

FEATURED IN

Miami Wire · NY Weekly · LA Reporter · LA Weekly
